4 key technologies . a quiet revolution

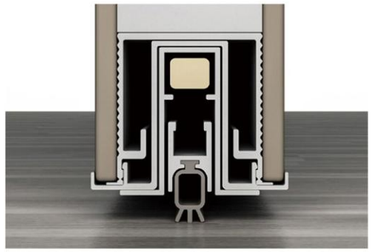

Thickened anti-collision strip

Leaf and frame meet with no gap - sound insulating and bump proof.

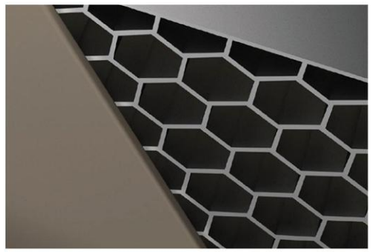

Door bottom lifting strip

Lifts when open, drops when closed: blocks sound, light, insects and dust, for more privacy.

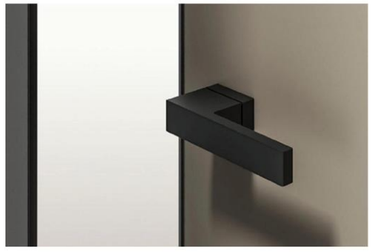

Aluminium honeycomb door core

Honeycomb hollow core: sound and heat insulating, eco friendly, flame retardant, stable and durable.

Magnetic soft-close lock

The latch springs out as the door closes - quiet and smooth, avoiding the bang of a traditional lock and scuffs on the frame.

Combination process

BEAUTIFULLY PLAN A SPACE

Here time is carved by stillness and motion, shaping a space of straight and curve.
No showiness, seemingly plain, yet the ultimate refuge of the purest form.
Like life: through simplicity we see a world of colour.
Here time is sculpted by static and dynamic, and a straight and curved space is beautifully planned.
It is not gorgeous, it seems plain, but it is the ultimate refuge of the most extreme style.
Just like life, through simplicity we see the colourful...

SHAPES — PURE CAPABLE

Smooth, crisp lines and an upright, timeless form: pure, capable and handsome. Bold abstract ideas meet condensed, restrained simplicity - the generous will surely achieve greatly.
Smooth and neat lines, upright and timeless shapes, a pure, capable and handsome fashion combination, great abstract ideas and concise and introverted perfect unity, the atmosphere must be great.

MINIMALIST DOOR SERIES

A minimal door is like a work of art, giving off an intoxicating sense of quality.

Built on pure minimalism, it strips away every excess and draws an elegant outline with flowing lines alone. The slender frame is like a fine picture frame, setting the beauty of the space just so. Every corner and edge is carefully finished to perfect geometric precision, giving off a glow of reason.

The choice of material shows the quality of a minimal door. Fine aluminium, solid wood or glass, with a fine grain and a warm touch. The crispness of aluminium sets off the clarity of glass, while the natural grain of solid wood adds warmth and honesty. These materials last, and grow more distinctive with the years.

When light falls on a minimal door the subtle play of light and shadow is a visual feast. A glass door lets light through freely for an airy, dreamlike mood; a solid wood door shows the texture of time under the same light. Day or night, a minimal door answers the light and adds a mysterious, captivating air.

Opening a minimal door is light and silent, like opening a new world. Its quality is not only in how it looks but in the life it lifts: it creates a calm, comfortable space where people find a resting place for the mind in a busy life.

Minimalist doors, like works of art, exude a intoxicating sense of sophistication.

It is based on ultimate simplicity, abandoning all unnecessary decorations and only using smooth lines to outline elegant contours. The slender door frame, like a delicate painting frame, meticulously frames the beauty of the space. Every corner and every edge has been carefully polished, presenting perfect geometric accuracy and emitting a rational radiance.

The selection of materials further highlights the premium quality of minimalist doors. High quality aluminum alloy, solid wood or glass, with delicate texture and warm touch. The toughness of aluminum alloy and the transparency of glass complement each other, while the natural texture of solid wood adds a warm and rustic touch. These materials are not only durable, but also able to withstand the test of time. With the passage of time, they emit a unique charm.

When light falls on the minimalist door, the subtle changes in light and shadow are like a visual feast. Glass doors allow light to freely penetrate, creating an ethereal and dreamy atmosphere; Solid wood doors, under the touch of light, display the texture of time accumulation. Whether it's natural light during the day or night, minimalist doors can perfectly interact with it, adding a mysterious and charming atmosphere to the space.

Opening the minimalist door, the light and silent action seems to be opening up a whole new world. Its sense of sophistication lies not only in its beautiful appearance, but also in the improvement of its quality of life it brings. It creates a peaceful and comfortable space for people, allowing them to find a spiritual home amidst their busy lives.

WOODEN DOOR SERIES

A wooden door, an important element of home life, is both practical and decorative.

Wooden doors, an important element of home life, combine practicality and decoration.
In practical terms, a wooden door gives you security and privacy. It is sturdy and durable, effectively blocking outside noise, dust, wind and rain, and creates a calm, comfortable interior. A quality wooden door also insulates well: in cold weather it cuts heat loss and energy use. In decorative terms, wooden doors come in a wide range of styles, colours and materials - from the flat slab of modern minimal to the carved panel full of classical charm - to match any interior. The grain and colour are natural and handsome, adding warmth and texture to a home. A door can be the finishing touch that lifts the taste of the whole space.
Wooden doors, as an important element in home life, combine practicality and decoration.
From a practical perspective, wooden doors provide you with a secure and private space guarantee. It is sturdy and durable, capable of effectively blocking external noise, dust, and wind and rain,

Create a peaceful and comfortable indoor environment for you.
Meanwhile, high-quality wooden doors have excellent insulation performance,
In the cold season,
It can reduce the loss of indoor heat and lower energy consumption.

In terms of decoration, wooden doors have a wide variety of styles, colors, and materials to choose from.
Whether it's a simple modern style flat door,
Still a carved door full of classical charm,
Can be matched with different home decoration styles.
The texture and color of wooden doors are natural and beautiful, which can add warmth and texture to homes.
It can be the finishing touch of a room,
Enhance the overall taste and style of the space.

Schematic of door opening measurement

Take the smallest of six readings: inner and outer, top, middle, bottom (height measured from the floor; if the floor is not laid yet, deduct the floor height)

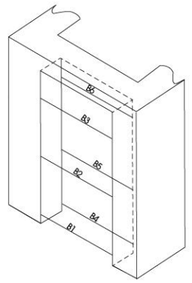

Take the largest of three readings: top, middle, bottom

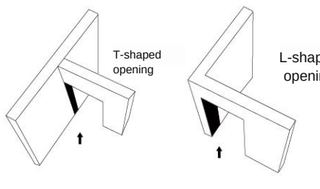

Note: tiling must not pass the opening line

Note: if a skirting is to be fitted, our surveyor will mark the casing line; if it is already fitted, the contractor must cut it back.

Take the smallest of six readings: inner and outer, top, middle, bottom

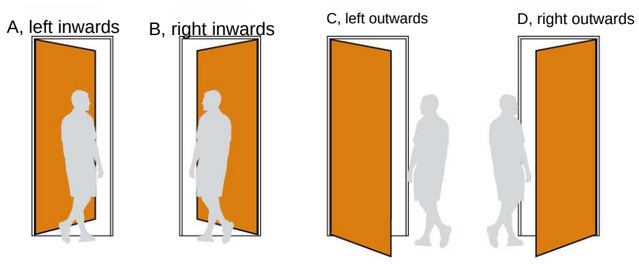

A T-shaped opening means the left or right jamb is zero (note it on the order).

Two ways to fit an L-shaped opening:/n1. Fit as a T-shaped opening. 2. Keep the outer casing complete and cut back the inner casing return (note it on the order).

Opening direction
